Dear Alexander Shakeel,

we would like to invite you to be a Reviewer at Computational and Systems Neuroscience (Cosyne) 2026 online submission system.

Please note that even if you already have an account in Confmaster, you still need to respond to the invitation to become a program committee member in the system.

To accept the invitation, gain access to the Cosyne 2026 submission system (Confmaster), and participate in the review process once submissions are assigned to you, please visit

https://cosyne.confmaster.net/invitation/3JjEx15J1kId/accept/

To reject the invitation, please visit

https://cosyne.confmaster.net/invitation/3JjEx15J1kId/reject/

IMPORTANT:

Please note that you need to create a new user account for Cosyne 2026. All user accounts are deleted after each Cosyne ends, and every new Cosyne begins with a fresh system.

To help us with automatic assignment of abstracts to reviewers and to help us resolve conflicts of interest during assignment, you will need to provide two samples abstracts of your previous or current work and a list of your collaborators and previous mentors if applicable.

To submit your sample abstracts, please log in to Confmaster (cosyne.confmaster.net), select 'Alexander Shakeel Bates' at the top of the screen, then select 'Edit Personal Data', and paste your *text-only abstracts* into the 'Sample Abstract' text fields and enter your list of collaborators and mentors into the 'Collaborators and mentors' field. Please *do not* submit your sample abstracts as regular Cosyne submissions.

Please note that if you don't submit your two sample abstracts, you won't be assigned any Cosyne submissions to review.

To help with the automatic assignment, please also add/edit your personal keywords by selecting 'Edit Personal Keywords' from the 'Alexander Shakeel Bates' menu.

Please submit your sample abstracts by *20 October 2025*. You can modify your submitted sample abstracts later by logging in to Confmaster and selecting 'Edit Personal Data' from the 'Alexander Shakeel Bates' menu at the top of the screen.

More information on Cosyne review process will follow in late October. If you have any questions regarding this invitation, please contact the Cosyne organizers at meeting@cosyne.org.

Thank you for your help with the Cosyne review process!

Best regards,

The Cosyne2026 Conference Chairs
